

The Learning Continuum Company, Ltd.

The Leader in Notes and Domino Training

Learn At Your Own Pace and At Your Place

(As of 1/6/2009)

The Learning Continuum Company's approach to Notes, Domino, Sametime and Quickr training uses the latest, most effective distance learning tools – tools that incorporate both on-line and off-line components. Simply download the course(s) of your choice from TLCC's web site. Once installed on your computer, you can take the course, work the exercises, and learn *off-line* at your own pace – any time, anywhere.

More flexible than conventional classroom training

Distributed learning technology allows TLCC to deliver our training to you, wherever you are, whenever you need it. Our modular sets of courses make it easy for you to pick and choose only the material you need. *There is no need for travel, no scheduling conflicts, no waiting for a course to become available and no cancellations.*

Need Help - A Certified Expert Instructor is a click away!

Innovative off-line exercises and instruction are enhanced by *on-line* collaborative discussion groups. A click of a button from any lesson in a TLCC technical training course takes you to an integrated discussion database which is monitored by TLCC's instructors. Our instructors will get back to you within one business day with a response to your question. To participate in the discussions, students in TLCC's Notes and Domino courses can replicate a local Notes database with TLCC or use a web browser, the choice is up to you. TLCC's combination of off-line training and on-line interaction provides you with important advantages over other instructional methods.

More interactive than videos, CDs or documentation

While these training aids *can* be effective, you're essentially on your own. At TLCC, your ability to collaborate and interact with our instructors and other students means help is there when you need it. Our activities and demonstrations are done live using the software you are learning – not simulations or screen shots. Almost every lesson has demonstrations to show you how the technology works and then activities so you get the hands-on experience you need. This allows you to apply what you have learned to your real-world situation.

Designed by world-class instructors and experts

The people behind TLCC are specialists – thoroughly grounded in Notes, Domino, Sametime and Quickr *and* well-versed in providing highly technical computer training to professionals like you. Since 1997, we have trained thousands of developer and administrators from more than 60 countries how to use Notes, Domino, Rational and WebSphere.

Try a free course and see for yourself!

The best way to evaluate TLCC's training is by actually trying a course or two - at no cost or obligation! The demo courses include a subset of the lessons from the actual course so you can see for yourself how TLCC's training works.

Notes Domino 8 Developer Courses

(As of 1/5/2009)

Notes Domino 8 Developer Update Course

Notes Domino 8 Application Development Update

This timely and comprehensive course will make you a Domino 8 expert. Easy, convenient and cost-effective, it will thoroughly prepare you for the certification exam required to become an **IBM Certified Application Developer - Lotus Notes® and Domino 8**.

Learn about the changes in the Notes 8 and Domino Designer 8 clients, including the new Eclipse based Notes 8 client. Take advantage of the new features to improve your forms, views and web applications. Learn about all the new formula language, LotusScript and Java enhancements. Learn to create LotusScript and Java code that can access web services and the changes in Domino web services. An extensive module covers the new Composite Applications and how they can integrate both Domino and other components on one page. Learn how to build, wire, and deploy composite applications. Discover how DB2 can be used as a back end storage in Domino 8 and how this enables developers to create more powerful applications that can integrate Domino across the enterprise.

This course is specifically designed for experienced Notes Domino 7 developers. This course includes many live demonstrations and student activities done right in the Domino Designer 8 client.

TLCC's *Notes Domino 8 Application Development Update* course - it's the ideal way to learn Notes Domino 8, prepare for the update exam, and quickly become certified.

☛ **Price: \$499 Units: 10**

Notes Domino 8 Core Courses

Notes Domino 8 Application Development 1

This distance learning course is for developers who are new to Notes and Domino application development. Using Domino Designer you will learn how to create a Domino database, create forms, add fields to a form, create views, use the formula language, and create agents. Enhance your application using framesets, outlines, pages, tables, single category views, layers, hotspots, buttons, and actions. Then complete your application by adding help documents and applying Domino security. This course is packed with demonstrations and activities to quickly get you developing Notes and Domino applications. As you

progress through the course you build a customer tracking application.

The *Notes Domino 8 Application Development 1* course will prepare you for the **Notes Domino 8 Application Development Foundation Skills** certification exam (834).

☛ **Price: \$599, save \$300 Units: 16**

Notes Domino 8 Application Development 2

This course will teach you how to take advantage of Domino's event oriented architecture for databases, views and forms. Use list processing to work with lists and build a cool dynamic table. Learn how to use Domino's many tools to lookup data in both Notes and relational databases with profile documents, @DbColumn, @DbLookup, DECS and DCR. The complete Domino security model is presented from top to bottom including access control lists, controlling agents, encryption, server controls and much more. Learn how to use Notes and Domino's integrated tools to develop workflow applications which route documents and e-mails automatically. Dive into Domino's architecture and learn the relationships between documents and design elements like forms. Speed up your applications with many performance enhancing techniques!

The *Notes Domino 8 Application Development 2* course will prepare you for the **Notes Domino 8 Application Development Intermediate Skills** certification exam (835).

☛ **Price: \$899 Units: 16**

Developing Domino 8 Web Applications

Learn the ins and outs of how to make your application function and look great on the web. Get the most from forms, views, and frames when displayed using a web browser. Use layers, CSS, and image resources to enhance your application. Learn how the Domino server interprets URL commands and how to secure your application. There are many demonstrations and activities you do right in Domino Designer to try out what you have learned. A Domino Server is not required.

This course will prepare you for the **Notes Domino 8 Developing Web Applications** exam (836.)

☛ **Price: \$699 Units: 12**

Check out TLCC's packages for the best savings!

JavaScript Courses

JavaScript in Domino 8

JavaScript is the language of choice on the web for performing tasks such as validating data and creating cool user interfaces like dialog boxes and roll-over images. Notes and Domino 8 allow the same JavaScript code to work in both a browser and a Notes client. In this course you will learn the basics of the JavaScript programming language, what it can do for you and how you can incorporate it into your Domino applications. First, you will learn the fundamental building blocks of the core JavaScript language, its syntax and how it relates to HTML. You then will become familiar with the JavaScript Object Model and how JavaScript employs object-oriented programming techniques for working with information on web pages. You will use Client-Side JavaScript objects, methods and events to create useful and interesting interfaces for your Domino web pages. Learn how to recreate Notes Client features that Domino can not port to web browsers such as dialog boxes and opening windows. Understand browser compatibility and the differences between the Notes client, Firefox browser, and Microsoft browser and how to handle them. This course is designed exclusively for Domino developers and includes many demonstrations and activities.

☞ **Price: \$599 Units: 10**

Using DB2 with Domino 8

DB2 for Domino 8 Administrators and Developers

Notes and Domino 8 can store Domino databases in DB2. In this course you will learn how to use this new feature of Domino by installing a DB2 server, enabling a Domino 8 server to store databases in DB2, and creating DB2 Access Views and Query Views. This course is designed for someone who has no knowledge of DB2 and includes the basics of administering DB2 and DB2 security. You will learn how to install DB2, set configuration parameters for DB2 instances and databases and how to back up and recover DB2 databases. Next, learn how Domino works with DB2 and how to install and configure a Domino 8 server to store databases on a DB2 server. Finally, learn how to create new types of applications that integrate Domino with DB2 by using DB2 Access Views and Query Views and allow Domino applications access to other DB2 databases (federated data.) This course is a great foundation to start using DB2 with Domino 8.

☞ **Price: \$499, Units: 10**

The Learning Continuum Company, Ltd.

The Leader in Notes and Domino Training

Notes Domino 8 LotusScript Courses

(As of 1/5/2009)

LotusScript Courses for Notes Domino 8

Beginner LotusScript for Notes Domino 8

Learn the basics of the LotusScript language and the Domino object model. This course is designed for both the programmer who has never worked with object oriented programming languages and the experienced coder who wants to learn the Domino Object Interface. Get started with the LotusScript programming language and some basic functions. Learn to use the basic building blocks of LotusScript including the different data types and when to use them. Discover how to work with strings and text and to control the flow of your program and LotusScript looping structures. Harness the power of arrays and lists to store your data. Explore object oriented programming and use LotusScript and the Domino Object Interface to access and operate on Notes and Domino objects. Learn how to work with both back-end and front-end Domino document objects. This course has many real life demonstrations and examples. You will learn LotusScript by actually writing real code, not a simulation, at your own pace and at your place!

☛ **Price: \$699 Units: 12**

Intermediate LotusScript for Notes and Domino 8

This course will expand your understanding and mastery of the LotusScript programming language and the Notes Object Interface. Learn how to control the user interface by using front end classes such as NotesUIWorkspace, NotesUIDocument, and NotesUIDatabase. Build user dialogs and prompts by using EditDocument, Prompt, and PickList. Manipulate information in fields. Work with doc links, attachments and embedded objects and learn to add text to a rich text field using different text styles, sizes, colors and fonts. Learn several different ways to gather and process groups of documents using various search techniques such as full text searches. Use the NotesViewNavigator, NotesViewEntryCollection, and NotesViewEntry classes to work with Notes views and folders. Enhance your applications by adding powerful reporting functions to create reports that go beyond the capabilities of standard Notes views. Generate and send memos and other documents using the Notes mail system and the NotesNewsletter class.

☛ **Price: \$899 Units: 16**

Advanced LotusScript for Notes Domino 8

Take your LotusScript skills to the next level with TLCC's *Advanced LotusScript for Notes Domino 6* course. Learn how to use subroutines, functions, and script libraries to reuse your code and create a library of commonly used routines. Build error-handling into your LotusScript code to effectively trap and handle run-time errors. Discover how to more effectively work with agents by using Notes logs to record agent activity and error messages. Get better control of your agents by understanding agent security and agent triggers. Learn how to integrate relational database information into your application. Use the LotusScript Data Object classes (LS:DO) to read and write data that resides in a relational database via ODBC. Next, use the LC LSX to read and write enterprise data via Lotus Connectors. Learn advanced techniques to program Rich Text fields and dynamically create tables, doclinks, and sections. Discover how to create a great looking internet email from a LotusScript agent using the MIME and NotesStream LotusScript classes.

☛ **Price: \$699 Units: 12**

Check out TLCC's Notes Domino 8 LotusScript Package for the best savings!

Using LotusScript in Domino 8 Web Applications

Successful Domino web applications require the use of agents to provide validation and back end processing for tasks like e-commerce and e-business. These agents perform similar functions to CGI scripts on other web server platforms. One way to create these agents in Domino is to use LotusScript. This hands-on distance learning course will show you how to create LotusScript agents that run when a user opens or saves a document and how to run agents from a web browser. Learn to create WebQueryOpen and WebQuerySave agents, run agents via a URL, pass data from one page to another using query strings, and to use the Print statement to send customized output to a web browser. Many live demonstrations and exercises are provided including examples of e-commerce applications. As with all TLCC courses, instructor help is only a click away!

☛ **Price: \$349 Units: 6**

The Learning Continuum Company, Ltd.

The Leader in Notes and Domino Training

Notes Domino 8 Java Courses

(As of 1/5/2009)

Java Courses for Notes Domino 8

Beginner Java Programming for Notes and Domino 8

This course will teach you the basics of the Java language and apply that knowledge to writing Java-based agents in Domino. Learn the basic Java operators, statements and core classes. Then learn how to use Java to access and interact with Domino Objects including the Session, Database, View, AgentContext and Document objects. This course is written exclusively for Notes and Domino developers and contains many live demonstrations and activities you do right in Domino Designer. This course also offers the option to use Eclipse or IBM Rational Developer as an alternate development environment to write Domino Java agents. This course will enable you to start programming in Java today!

☛ **Price: \$599, Units: 10**

Intermediate Java Programming for Notes Domino 8

Take your Java programming skills to the next level with TLCC's *Intermediate Java Programming for Notes Domino 8* course. Learn how to use the core Java classes to work with strings, numbers, vectors, arrays, and to read and write information from the hard drive and the internet. Learn web application techniques like performing field validation, preventing multiple submissions of incomplete forms, and passing data using URL variables. Build a cool web based order form that will hold multiple items. Use the Domino Objects for Java classes to access and work with Notes items, rich text items, documents, views, view entries and document collections. Use a Java agent to build reports to show the information in a database exactly the way you want using the rich text classes. This course is an excellent way to learn Java in the familiar Domino environment and also how to use other Java programming environments like Eclipse or Rational Developer to create Domino agents..

☛ **Price: \$899, Units: 16**

Web Services Course for Notes Domino 8

Using XML and Web Services in Notes Domino 8

This course will introduce the Domino Developer to XML and web services and covers the basics of XML including terms such as "well-formed" and "valid." How to incorporate XML into Domino Applications using standard design elements such as agents, forms, pages and views. Parse and import XML data into Domino applications using both LotusScript and Java agents. Use XSLT style sheets to transform XML data in Domino agents. Use the Domino XML Language (DXL) to both export and import Domino data and design elements. Expose your Domino data via an RSS Feed. How to use Domino 8 to make available web services (using both LotusScript and Java) for use by any web services client. Consume web services from the Notes client.

In addition to Domino Designer, the course makes use of either Eclipse or IBM Rational Application Developer as an alternate application development platform when developing Java agents and web services.

This course will prepare you for **Exam 805: Using Web Services in IBM Lotus Domino 8 Applications**. Pass this exam to become an **IBM Certified Advanced Application Developer - Lotus Notes and Domino 8** (provided you are already certified at the Application Developer level.)

☛ **Price: \$699, Units: 12**

Notes Domino 8 Administrator Courses

(As of 1/6/2009)

Notes Domino 8 Administration Update

Notes Domino 8 System Administration Update

Attention Notes and Domino 8 System Administrators! Easy, convenient and cost-effective, this course will thoroughly prepare you for the update exam required to become an **IBM Certified System Administrator - Lotus Notes and Domino 8**.

Learn about the changes in the Notes 8 clients, including the new Eclipse based Notes 8 Standard client. Discover the changes in the Domino 8 server and the Domino 8 Administrator client including new policy settings, performance, and security enhancements. Take advantage of the new messaging improvements including message recall, the new out of office task, and how to automate InBox maintenance. Discover the improvements to server monitoring using Domino Domain Monitoring and the Monitoring Configuration database. Learn how to upgrade your Domino servers to Domino 8 and how to deploy the new Notes 8 Standard client across your organization, including how to setup an Eclipse Update Site. This course also includes an introduction to the new feature to allow Domino databases to be stored in DB2.

The course includes complete instructions on how to setup the course environment including a test Domino 8 server. TLCC's *Notes Domino 8 System Administration Update* course - its the ideal way to learn Notes Domino 8, prepare for the update exam, and quickly become certified as an **IBM Certified System Administrator - Lotus Notes and Domino 8**.

☞ **Price: \$499 Units: 10**

Get both System Admin courses plus three CertFX practice certification exams together in TLCC's Notes Domino 8 Certified System Administrator Package and save!!!

Notes Domino 8 Administrator Courses

Notes Domino 8 System Administration 1

In this course you will learn the fundamentals of administering Domino 8 by installing and configuring a small Domino network from the ground up. Learn the ins and outs of using the Domino Administrator client. Get a solid grounding in how Domino security works, from user IDs to server access to database ACLs. Configure mail routing between your Domino servers and between your network and the Internet. Configure replication between your Domino servers and find out how to control what replicates. Learn the tricks to troubleshoot mail routing and replication. Understand how to securely enable your Domino server to act as a web server. This course, along with *TLCC's Notes Domino 8 System Administration 2* course, will prepare you for all three exams required to become an **IBM Certified System Administrator in Notes Domino 8**.

☞ **Price \$699 Units: 12**

Notes Domino 8 System Administration 2

The second course in TLCC's Admin series covers more advanced topics, such as mail routing between different domains, preventing spam, user management, and other skills needed to maintain and fine tune an existing Lotus Domino infrastructure. Learn how to manage Lotus Domino users, from registration to renaming to deletion. Setup the roaming user and multi-user workstation features. Discover how to control your users' settings through policies. Monitor the Lotus Domino servers and learn how to be notified when certain events happen. Keep spam under control with blacklists and mail rules. Finally, dive into advanced administration topics, such as the CA process for certification, administering Lotus Domino from a web browser, and setting up secondary directories.

Upon completion of this course and TLCC's *Notes Domino 8 System Administration 1* course you will be prepared to take all three of the exams needed to become a **Certified System Administrator in Notes Domino 8**.

☞ **Price: \$699 Units: 12**

Using DB2 with Domino 8

DB2 for Domino 8 Administrators and Developers

Notes and Domino 8 can store Domino databases in DB2. In this course you will learn how to use this new feature of Domino by installing a DB2 server, enabling a Domino 8 server to store databases in DB2, and creating DB2 Access Views and Query Views. This course is designed for someone who has no knowledge of DB2 and includes the basics of administering DB2 and DB2 security. You will learn how to install DB2, set configuration parameters for DB2 instances and databases and how to back up and recover DB2 databases. Next, learn how Domino works with DB2 and how to install and configure a Domino 8 server to store databases on a DB2 server. Finally, learn how to create new types of applications that integrate Domino with DB2 by using DB2 Access Views and Query Views and allow Domino applications access to other DB2 databases (federated data.) This course is a great foundation to start using DB2 with Domino 8.

"Make Your Own" Packages

<i>Package</i>	<i>Price</i>	<i>Access Time</i>
25 Unit Package	\$1,149	6 months
50 Unit Package	\$2,099	1 year

TLCC's "Make Your Own" Packages are designed to allow an individual to pick the courses they need. Each TLCC course has a "unit" value (from 2 to 16 units.) Purchase a package of units, then sign up at TLCC's Web site for any course you want. TLCC will track how many units you have remaining. Access Time is how long you have to sign up for your courses and complete them with instructor support. **Note, these packages are designed for use by one person only and may not be shared.**

The Learning Continuum Company, Ltd.

The Leader in Notes and Domino Training

Corporate Volume Savings

(As of 1/6/2009)

Corporate Developer and Admin Packages

Corporate Packages allow an organization to purchase a fixed number of TLCC Notes/Domino developer and administrator course "units" at tremendous savings and apply those to any employee. The training manager will use a special User ID at TLCC's web site to register students, assign courses, and view the number of units remaining. Once assigned, the student receives immediate access to the course and can start using TLCC's high quality training courses from any location. For example, the *Notes Domino 8 Application Development 1* course is 16 units. Every time a student is assigned to this course TLCC will deduct 16 units from the remaining balance. There is a limit of one year to use all the units in the package. TLCC's web-based tracking application allows the training manager to track what courses were taken by each employee.

TLCC's corporate package customers include IBM/Lotus, Raytheon, Abbott Labs, the Government of New Zealand, and many other organizations. These companies use TLCC's corporate packages to save on their training expenditures, cut back on travel, and have the flexibility to train their employees when they need the skills.

The advantages of TLCC's corporate packages are:

- ✓ **Ease of use** - TLCC's corporate package system is an easy to use education ordering and tracking system for your technical staff and managers.
- ✓ **Lower your training investment** - TLCC's corporate package pricing is the least expensive way to get TLCC's developer and administrator courses and is much more economical than classroom training, PLUS, there are **no travel costs** and students get trained when they need the skills, not when a class is being offered.
- ✓ **Train on your schedule** - Provide your employees with the skills they need at your convenience. Starting a new project which requires new skills? Your employee can get immediate access to a TLCC course and can take the courses at any time and from any location, even while commuting on a train!

<i>Package</i>	<i>Price</i>	<i>Access Time</i>
100 Unit Package	\$4,000	1 year
200 Unit Package	\$7,500	1 year
400 Unit Package	\$12,000	1 year

Here's an example of TLCC's pricing compared to the typical classroom pricing.

	<i>Course Units</i>	<i>Classroom price per training day</i>	<i>TLCC Price per training day</i>	<i>TLCC price compared to classroom</i>
Single Course	varies	\$500 per day	\$240	48%
100 unit corporate package	100	\$500 per day	\$160	32%
200 unit corporate package	200	\$500 per day	\$150	30%
400 unit corporate package	400	\$500 per day	\$120	24%

(Four units are roughly equivalent to one classroom day.)

The Learning Continuum Company, Ltd.

The Leader in Notes and Domino Training

Notes 8 User Training

(As of 1/6/2009)

TLCC Notes-Based Training is the easiest, most effective way to train thousands of Notes users simultaneously - at an incredibly low cost per user. For one low site license (significantly less than the cost of other training options) you get ALL the courses you need to train your users regardless of whether they have never used Notes before or are upgrading from a previous version of Notes. The Notes 8 user site license **includes**:

- **Notes 6 to 8 User Update** - This course is for Notes 6/6.5 users moving to the Notes 8 Standard configuration client.
- **Notes 7 to 8 User Update** - This course is for Notes 7 users moving to the Notes 8 Standard configuration client.
- **Using the Notes 8 Standard Client** - This course is for users who have never used Notes before, and who will be using the Notes 8 Standard (Eclipse-based) client.
- **Using the Notes 8 Basic Client** - This course is for users who have never used Notes before, and who will be using the Notes 8 Basic client.
- **Using Domino Web Access 8** - This course covers how to use Domino Web Access 8 to access Domino mail, calendar and contacts.

Runs on Notes and Domino - When comparing TLCC's Notes user courses to other training methods on the market, the biggest difference - and greatest benefit - is that TLCC courses use the Notes client. TLCC courses do not simulate the Notes environment. Instead, they are delivered as a set of Notes databases which are easily deployed in your existing Notes and Domino implementation. The best way to deliver Notes training is by *using* Notes - not a simulation of it. All demonstrations and student activities use the Notes client which provides the highest level of learning reinforcement and effectiveness. The advantages of delivering Notes training using Notes include:

- The course is delivered to each student's workstation using your existing Notes and Domino infrastructure.
- No additional hardware, software or licensing requirements.
- No classroom, travel, or out-of-office costs.
- Use the familiar Notes client to customize the course content to your specific requirements and to deploy, administer and support the course.
- Integrated student activities are highly interactive and provide immediate reinforcement of lesson material.
- No simulations. Real Notes student activities are the most effective and engaging way to reinforce learning.

A web browser can be used to read the lessons if a Notes client is not available to the student (and for the DWA course.)

Self-Paced Learning - TLCC's user courses are designed to allow students to proceed through the material at their own pace. Students can start the course at any time and return to the course as needed to learn or review the topics.

An instructor monitors the integrated course Discussion database and responds to students' questions. This "open door" design allows thousands of students to take the course at the same time, makes it easy to coordinate training with your rollout, and reduces the need for course administration and instructor support.

Students learn by reading, watching and doing. The lessons in each course are a combination of text, annotated graphics (screen images) and short videos. The short videos (animated GIF files with no audio) illustrate the concepts and procedures presented in the lesson and are a great reinforcement to what the user will learn in the lesson. Once the lesson is completed than students will perform the tasks taught in that lesson in an activity.

Interactive Student Activities - A student activity is combined with almost every lesson. This learning model provides immediate reinforcement of the important points or procedures in the lesson and maximizes retention.

User Training Right in the Notes 8 Sidebar! - One complaint about traditional training is that the students often forget what they learned as soon as they leave the classroom. TLCC's Notes 8 user courses have an option to deploy the list of topics right in the Notes 8 sidebar. This lets users easily see the topics from the course and quickly navigate to a topic they might want to learn more about. This allows for dynamic training as needed. A user can click on any lesson in the Notes 8 sidebar and that lesson will open up in a new tab in the Notes client.

Course Discussion Monitoring and Support - TLCC's user courses include a Discussion database which takes advantage of Domino's proven collaboration capabilities.

The course Discussion database allows students to post questions linked to the lessons in the course. The Discussion database provides a communication link between your user support team and the students as they are taking the course. The advantages of providing course discussion monitoring and support are:

- Allows you to provide individual and specific student support.
- Students can get help and do not feel they have nowhere to turn if they are “lost.”
- Provides immediate feedback during the rollout and training phases of your project.
- Students can learn from other students’ questions and answers.

A button can be enabled to allow students to chat with instructors if they are using a Notes 6.5 or higher client or a web browser to view the course. The discussions can be disabled if desired.

Help system - Context-sensitive help is available to describe how to use the course, how to post questions and how to review course-related discussion.

Module Self-Assessments or Quizzes - Each module includes a self-assessment quiz. The format for the self-assessments is Multiple Choice and True/False questions. For each question, the student can display the correct answer and compare their response. Self-assessments provide immediate feedback, allowing the student to assess their understanding of material presented in the current course module.

Optional Final Exam - An optional final exam can be enabled to test each student on their comprehension of the material or to ensure compliance with mandatory course completion policies. Detailed exam summary results are posted in the Exams database, allowing an Exam

Administrator to identify students who may require additional training.

Optional Course Customization - The material in the TLCC user courses can be customized to best suit the needs of the target students and your implementation. Detailed procedures and customization recommendations in the *Course Setup Database* which is included. Lessons can be changed, added, or deleted. The advantages of TLCC course customization include:

- Customize course content to best suit the needs of the target students and your implementation.
- Create and customize different versions of the course for different groups of students.
- Use the familiar Notes client to easily customize the course content.

Flexible Delivery - Students take TLCC’s courses using a Notes client (or a web browser.) The course can be accessed from a Domino server or can be downloaded to the student's computer and taken locally. Mobile and remote users can take the course locally without using expensive and/or slow connections to a Domino server. Students take the course geared for their needs, either a new Notes user or a user who is upgrading to a new version of Notes. This wide flexibility of access options accommodates different company and student needs.

System Requirements - A Notes 8 client is needed to be able to take the course and perform all demonstrations and activities. A Notes 6 or 7 client can be used to view the lessons in the Notes 8 courses and to take the quizzes and final exam. This allows the users to get started learning about Notes 8 before their migration to the Notes 8 client software. The lessons can also be accessed via a web browser.

Course Pricing - TLCC’s user courses are sold via a one-time site license based on the number of users in the Domino Directory (Public Name and Address Book). The Notes 8 site license pricing is as follows:

<i>Number of users in Directory</i>	<i>License</i>	<i>Maintenance (per year) ⁽¹⁾</i>
1 to 50 users	\$1,250	\$200
51 to 100 users	\$2,500	\$375
101 to 250 users	\$4,500	\$675
251 to 500 users	\$6,000	\$900
501 to 1,000 users	\$7,500	\$1,125
1,001 to 3,000 users	\$11,000	\$1,650
3,001 to 5,000 users	\$15,000	\$2,250
5,001 to 10,000	\$25,000	\$3,750
Unlimited number of users	\$35,000	\$5,250

(1) TLCC provides support for installation related questions for 30 days after purchase. Purchase of a maintenance contract allows for access to download the latest releases of the user courses and installation and customization support beyond the 30-day period.

There is a 50% discount on the license fee for TLCC Notes 6 or 7 course licensees who have a current maintenance plan.

Free demonstrations of TLCC’s user courses are available at <http://www.tlcc.com/users>.

Quickr 8 User Training

(As of 1/5/2009)

TLCC User Training for Quickr 8 is the easiest, most effective way to train thousands of users simultaneously - at an incredibly low cost-per-user. For a **low one time license price** (significantly less than the cost of other training options) you get the two courses you need to train your users. The Quickr 8 user site license **includes the following courses**:

- *Using Quickr 8*
- *Creating and Managing a Quickr 8 Place*

Flexible Delivery - TLCC's user courses are delivered as a set of Notes databases which are easily deployed in your Quickr implementation. The courses can be taken using a Notes client or a web browser. The advantages of TLCC's flexible delivery are:

- The course is delivered to each student's workstation using your existing Quickr server infrastructure.
- No additional classroom, travel, or out-of-office costs.

Self Paced Learning - TLCC's user courses are designed to allow students to proceed through the course at their own pace. Students can start at any time and return to the course as needed to learn or review the topics. Thousands of students can take the course at the same time.

Interactive Student Activities - A student activity is combined with most lessons. This learning model provides immediate reinforcement of the important points in the lesson and maximizes retention.

Course Discussion Monitoring and Support - Courses include a Discussion database which allows the students to post questions linked to the lessons. The Discussions provide a communication link between your user support team and the students as they take the course.

- Allows you to easily provide specific student support.
- Students can get help and do not feel they have nowhere to turn if they are "lost."

The Discussion database can be disabled if desired.

Instant Messaging Support - A button can be enabled to allow students to chat with instructors.

Help system - Context-sensitive help is available to describe how to use the course.

Module Self Assessments or Quizzes - Each module includes a self-assessment quiz. The student can display the correct answer and compare their response. Self-assessments provide immediate feedback, allowing the student to assess their understanding.

Optional Final Exam - An optional final exam can be enabled to test each student. Detailed exam results are stored.

Optional Course Customization - The material in the TLCC user courses can be customized to best suit the needs of the target students and your implementation. The advantages of TLCC course customization include:

- Customize content to best suit the needs of the target students and your implementation.
- Create and customize different versions of the course for different groups of students.

Course Pricing - TLCC's user courses are sold via a one-time site license based on the total number of users as follows:

<i>Number of users in Directory</i>	<i>License</i>	<i>Maintenance (per year) ⁽¹⁾</i>
1 to 50 users	\$950	\$150
51 to 100 users	\$1,875	\$300
101 to 250 users	\$3,000	\$500
251 to 500 users	\$4,500	\$675
501 to 1,000 users	\$5,500	\$825
1,001 to 3,000 users	\$8,000	\$1,200
3,001 to 5,000 users	\$11,000	\$1,650
5,001 to 10,000	\$18,000	\$2,700
Unlimited number of users	\$26,000	\$4,000
